

1st March 2021

Dear Parents/Guardians,

COVID-19: Precautionary Measures at School

Routine Health Screening

We would like to welcome back all students to MIGS as the school reopens on 8th March 2021. For a safe reopening of the school campus, all the COVID-19 safety measures will be practiced. **Covid-19 health screening (temperature monitoring & its symptoms)** will be practised as usual closely in line with Malaysian Health Authorities' procedures to all students and staff arriving at School daily at the Main Porch Entrance using the Thermal Scanner. Parents and visitors are also reminded to register/check in via the MySejahtera App and QR codes situated at the main entrance.

We would like to remind all parents to continue to monitor your children at home and seek medical attention if your children are not feeling well and shows symptoms as below (before sending them to School):

- fever (37.5°C and above)
- coughing/sore throat
- difficulties in breathing
- cold/runny nose

In the event a student's temperature registers **37.5 degrees Celsius and above or having symptoms as mentioned above**, he/she will need to return home or to be taken to the doctor immediately. We strongly advise to allow your children to rest at home and see a doctor if they feel unwell or show symptoms as mentioned above. Please do not send them to School until medically certified fit for school and symptoms are cleared for the safety of all.

Health Declaration Form

A **Health Declaration Form** link is attached in the email for a COVID-19 risk assessment by the School. All students (or parents on behalf) are required to fill in the form through the provided link in the email to revert before coming back to school on 8th March 2021.

Safety measures whilst at school:

1. ALL students **must wear a face mask whilst at the school campus.**
2. Hand sanitizer will be given to clean their hands before entering the School.
(Wall-mounted hand sanitizers are available all around the School)
3. Students are also encouraged to bring their own hand sanitizers, wet wipes, a zip lock style bag for their mask when eating and extra masks in case they are dropped, damaged or lost.
4. We will constantly remind and assist students to maintain high levels of hand hygiene (washing hands) before meals and after activities.
5. Students are not allowed to share food or items of stationery with other students.
6. We will reinforce and assist all students to maintain 1-metre social distancing at all times throughout the School session.

Dealing with COVID-19: Procedures and Documents

We would like to remind all parents of the procedures and documents that need to be submitted before returning to school if your children happened to experience the following situation (please notify the school if):

1. Students infected with COVID-19
2. Family members infected with COVID-19 but the student of MIGS is tested negative (post quarantine)
3. Travelled from other countries to Malaysia

Kindly be informed that once the health authorities allow the student to attend school or free from quarantine, please obtain a **COVID-19 clearance letter or COVID-19 tested negative swab test result** from the attending doctor/hospital/clinic.

The **COVID-19 clearance letter or the swab test result MUST be submitted or emailed to the school** (class teacher/school nurse) before returning to school. This is an attempt to safeguard the wellbeing of the MIGS community.

As always I would highly appreciate your support and cooperation on this matter. We will continuously abide by the ministry's advice to ensure all the Covid-19 precautionary measures are in place to safeguard students and everyone's well-being. Take care and stay safe. Thank you.

Yours sincerely,

Ms Reka (RN)
School Nurse

Mr John P Birch
Principal
